## 5 Constitution

### 5.1 Working Groups

WG NO.: (NOTE:) Current CCSDS (<http://cwe.ccsds.org/default.aspx>) 27 technical WGs, distributed along 6 different Areas of specialization, effectively function as ISO TC20/SC13 WGs, as well. The flow of Recommendations for standardization generated by those WGs is strictly directed by CCSDS for ingestion into ISO TC20/SC13 Subcommittee Program of Work, for their transformation in ISO Standards, under the Cover Sheet process.

## 6 Any other matters of importance to ISO/TC 20

Last 37th Plenary ISO TC20/SC13 Subcommittee meeting was held in collocation with those of CCSDS management meetings, hosted by INPE and ABNT, in São José dos Campos, SP, Brazil, on 10 June, 2010. The upcoming, 38th ISO TC20/SC13 Subcommittee meeting is scheduled to be an informal one and will also be held in collocation with the CCSDS-CMC, besides IOAG, and will be co-sponsored by U.K. Space Agency and BSI, at BSI facilities in London, U.K., in the week of November 1-5, 2010.

In respect to ISO/TC20 **Business Plan**, in its version N3396, Version 2, Draft 8, as of June 1st, ISO TC20/SC13 Subcommittee has **three suggestions** for consideration and desired modification by ISO/TC20, as follows:

1) In page 10 of 23: MODIFY the text .

**FROM:**

"CCSDS - Development of the most well-engineered space data handling standards in the world To enhance governmental and commercial interoperability and cross-support, while also reducing risk, development time and project costs."

**TO:**

"**CCSDS** - Development of well integrated space data and information transfer systems recommendations for standardization, with the primary objective of enabling cross-support at national and international levels, with the use of interoperable resources which solidly rely on interoperable capabilities which, in turn, do contribute for the reduction of risk, costs and of project and development times, with the inclusion of the resulting operational procedures."

2) In Section 2.3.1 of page 10 of 23, in the form of a new item "b", INSERT the text:

b) In respect to the development of standards for Space Data Systems, a pioneering NASA-ESA effort in the late 70s and early 80s resulted in an effort of international scale, with the creation of the Consultative Committee for Space Data Systems - CCSDS, in 1982. Since then, an increasing number of Recommendations for standards resulted, with almost immediate application to space missions. In the early 90s CCSDS products started their migration to ISO domain, to become ISO Standards. Currently, well above 400 space missions, worldwide, have already adopted those Space Data Systems standards, for the benefit of their capabilities, which continue to involve the use of interoperable and of cross-supportable systems, configured in different combinations of ground and

onboard systems which, in many cases, operate under a true international scenario.

**3) In page 15 of 23, under section 3.4, item a), the ADDITION of the bullet:**

"To enable interoperability and collaborative, world-wide cross-support among space data systems, as it has already been substantiated by an ever increasing number of spaceflight missions."

-----

ISO TC20/SC13 Subcommittee is in the process of formalizing some of its still informal, internal and external liaisons. This report provides a complete list of all the liaisons which are under consideration by the Subcommittee.

The liaison cooperation which exists between CCSDS MOIMS Navigation Working Group of CCSDS and ISO TC20/SC14 Working Group 3 on Operations and Ground Support is also supported by ISO TC20/SC13 Subcommittee. The mentioned liaison had active participation in the production of CCSDS 502.0-B-2 Orbit Data Messages Recommendation for standard. That same Recommendation was forwarded to ISO domain and is in the process of becoming the ISO 26900 Standard on Orbit Data Messages. A New work item is being considered under this same liaison cooperation, and is being associated to the subject denominated by Conjunction Assessment Message (CAM). ISO TC20/SC13 Subcommittee, backed by CCSDS, is willing to continue exploratory work with ISO TC20/SC14 Subcommittee that may lead to new items of work of complementary nature, which may lead to new standards in space systems, in general.

Eduardo W. Bergamini  
Chairman, ISO TC20/SC13

Michael W. Kearney  
Secretary, ISO TC20/SC13

## 7 Programme of work

The contents of this Program of Work incorporate the **complete** contents which are found in the **ISO Project Portal** (<http://isotc.iso.org/pp/search/default.action>) associated to ISO TC20/SC13 Subcommittee and also, take into consideration corresponding CCSDS ([www.ccsds.org](http://www.ccsds.org)) originated information and also, strictly, the ISO International harmonized stage codes table, which is also included in this context. As a result, from now on, this Program of Work is intended to regularly provide, with maximum possible completeness, a view of the past standards, of the current standards and of the working items of ISO TC20/SC13 Subcommittee. The contribution of Mr. Nick Tongson, in charge of the secretariat support to the ISO TC20/SC13 Subcommittee, has been important in the preparation of the contents of this original version. The Chairman of ISO TC20/SC13 Subcommittee wishes also to acknowledge the invaluable work being provided by Ms. Síntique Rodrigues in the build up and maintenance of this Program of Work, as being presented and to be maintained on a regular, monthly basis. The current, **version** of this Program Work was prepared in: **October, 2010 (original version)**.
