

**ISO/TC20/SC13 Meeting
Tsukuba, Japan, 17 June 2008**

**Report of the United States Technical Advisory Group to ISO/TC20/SC13
November 2007 – June 2008**

Meetings

USTAG13 held its semi-annual meeting via a two day nationwide videoconference on 13 – 14 February 2008. The purpose of this meeting was to develop the official US technical working group positions to be conveyed during the March 2008 CCSDS/SC13 technical meeting series in Arlington, Virginia, USA.

Work Items

The following documents were reviewed and approved by USTAG13 during the work period between November 2007 and June 2008:

ISO 14961:2002 – Systematic Review – recommendation was to confirm document

ISO 14721:2003 – Systematic Review – recommendation was to revise/amend

ISO 15889:2003 – Systematic Review – recommendation was to confirm, with correction of errors

ISO 21961:2003 – Systematic Review – recommendation was to confirm

ISO 21962:2003 – Systematic Review – recommendation was to confirm

The USTAG13 Chairman is pleased to highlight the recent increased involvement by non-NASA U.S. personnel in the activities of the SC13 spacecraft onboard interfaces “Plug-and-Play” working group.

Respectfully submitted:

Adrian J. Hooke, U.S. Representative to ISO-TC20-SC13
