

# Fall 2020 CCSDS Virtual Meetings

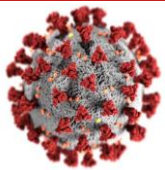

1

## MOIMS – SM&C Working Group

A SERIES OF 5 MEETING

OCTOBER-NOVEMBER 2020

### COVID-19

These are challenging times globally. Most of us are working from home and the restrictions are always being updated. The challenges for everyone are great. Let's hope everyone can stay healthy, keep their priorities straight, and stay balanced.

# Toulouse, France

Where we will now meet in Fall 2021

Since 2016, the fourth-largest city in France has become the capital of the second largest region of France, the new region of "Occitanie", which stretches from the Rhone in the east to within 60 miles of the Atlantic coast in the west. Modern Occitania is similar in extent to the great County of Toulouse which, from the 9th century until the end of the 13th, was an independent territory of southwest France.

Since the middle of the 20th century, Toulouse has once again established itself as a major industrial player, this time as capital of the French and European aerospace industry. The Toulouse-Blagnac airport complex was the birthplace of the Anglo-French supersonic jetliner Concorde, and today Blagnac is the headquarters and main manufacturing plant of the European consortium Airbus. It is here, for instance, that the giant Airbus A380 superjumbos are assembled, using parts produced in facilities in several different countries of Europe

## The Pink City

It sounds better in French, as *La Ville Rose*, and the expression "*pink city*" doesn't really describe Toulouse: a more fitting epithet would be "the redbrick city".... since the word "rose" refers to the colour of the local bricks. But then again "redbrick" has the wrong connotations. Toulouse's red brick is not the red brick of 19th century industrial cities, it is red brick made, since Roman times, from the red alluvial mud dredged out of the river Garonne – the red of Mediterranean roof tiles, a pinky red with all the warmth of southern Europe.

In Toulouse and the surrounding area, red brick is the traditional building material, and it is this red brick that has given the city its nickname. It is the only large historic French city, apart from the industrial cities of the north of France, where brick has long competed with stone as a major building material.

## CCSDS / MOIMS / SM&C WG. Fall 2020 Virtual Meeting Series

Each meeting is scheduled for 2 hours via WEBEX and will start at JPL/6am, GSFC/9am, ESA/3pm

3

Meeting #	Date/Time	Theme	Topics	Leader/Presenters
1	Monday October 26, 2020	SM&C Business	<ul style="list-style-type: none"> <li>Welcome!</li> <li>Area Director Comments - Mario Merri</li> <li>Book status, CWE update</li> <li>IOAG, OMG Update</li> <li>Review new CCSDS website</li> <li>Team member news, comments</li> <li>Goals for the meetings</li> </ul>	Dan Smith
2	Wednesday October 28, 2020	MO Working Session #1	The team full team will participate in considering substantive changes to the MO standards including the Com Object Model and the functional services. Work will continue daily between the meetings.	Sam Cooper
3	Friday October 30, 2020	MO Working Session #2	Continuation of MO Working Session #2	Sam Cooper
4	Tuesday November 3, 2020	MO Working Session #3	Continuation of MO Working Session #3	Sam Cooper
5	Thursday November 5, 2020	MO Use Case and Meeting Wrapup	Summarize work from the week and see how specific use cases would now be handled. Review minutes and actions from the week and charts for delivery to Area Director.	Dan Smith Sam Cooper

We still need to work on our virtual beer plans.
